Introduction

Safeguard Armor

As the leading premium body armor designer one of our goals is to deliver the best armor carrier systems in the world to everyone that needs protecting. We have a range of carriers made from the highest quality materials available on the market. Our vests have been carefully engineered and mastered to hit the perfect balance between comfort and protection. Our body armor is also 100% customizable with multiple protection and threat options available. If you want protection you can rely on SafeGuard Armor. Safeguard Armor has offices in Leeds, UK and Rogersville, US. These offices house complete research and production facilities with the capability of producing and distributing a wide range of body armor. Products we offer includes a range of bulletproof and stab-proof vests, hard armor plates and ballistic helmets.

Capabilities

Our production facilities (20000 sq ft) in total are equipped with a range of high quality equipment that increases efficiency and the scale of production. Our headquarters house the sales and marketing team, customer services, the accounts department, and the technical team. Each team provides detailed records and statistics of their work to allow for continual research and improved efficiency. The persistent research areas use statistical analysis and dedicated equipment to continually develop and improve all products, which are regularly passed on to customers and clients.

Production Timescales:

Safeguard Armor products are compliant with the following standards:
NIJ Standards - 0101.06 (Ballistic resistance to body armor)
NIJ Standards - 0115.00 (Stab resistance to body armor)
HOSDB Body Armor Standards (Ballistic resistance)
COVERT BODY ARMOR

Our high-quality ballistic, stab and spike panels are available in a wide range of covert carriers. Ballistic protection is available unobtrusively, comfortabily, and discretely. Hidden under clothes, the vest can be out of sight, and excessive anxiety regarding bullet related threats can be put very much out of mind. Covert vests are lightweight and practically undetectable. The carriers are manufactured using softer fabrics so that they remain comfortable when in contact with your skin for long periods of time and can be made in different colours in order to be worn underneath any clothing.

GHOST

OVERT BODY ARMOR

With Safeguard, durable and dependable overt body armor is available in a range of styles to fit your requirements. Our overt body armor has been thoroughly tested to ensure that you are able to get the best quality for the most affordable price. They are made from hardwearing materials so they can withstand the toughest of terrains. All our overt vests come with a water resistant coating as standard and available in a range of ballistic, stab and spike protections levels. Our vests will give you protection from a range of threats and are available in a range of colours to match your surrounds.
HARD ARMOR PLATES

For an individual who is under much greater threat, rifle resistant plates can be used with soft armor (ICW) or on its own (Standalone). This armor will provide an individual with the added protection that they will need to stay protected when under rifle fire. The hard plates used in rifle resistant armor are often much heavier than other forms of protection, so it is vital that this armor is only worn when it is absolutely necessary. Our hard armor plates come in a range of shapes, sizes and protection levels depending on the threats you may face. Materials used in our plates include both Polyethylene and ceramic resulting in both lightweight and cost effective solutions.

STRIKE FACE

  - LEVEL III OR IV PROTECTION
  - VARIOUS WEIGHTS AVAILABLE
Our Alphacore™ ballistic helmets are available in a range of styles and colours, all offering ballistic level IIIA protection. We have taken the time to find a variety of helmets that allow you to customise your look, while still keeping your head fully protected. The variation of color is ideal for any team that wants to have a uniformed look through matching helmets. The black, navy blue, olive drab and tan colors are not overly bright and will not attract unwanted attention. Our helmets which include picatinny rails and VAS Shroud can have a variety of attachments applied to them. Our helmet weights vary between 1.4kg and 1.6kg depending on style and size.
